

(Glitch Mage Spell Descriptions Cont. 6)

Syntax Error:

- 9th-level dimension
- Casting Time: 1 minute
- Range: 100 ft
- Components: V, *M(Terminal)
- Duration: 5 minutes
- If this spell is cast without interruption, the caster selects an 80 ft cube within range. Everything within the affected area is essentially frozen due to glitches (even the caster & their allies). Anything that enters the affected area during the duration is also frozen due to glitches. Creatures in battle affected by this spell cannot be harmed during the duration and are counted as excluded from battle. Once the spell is over, affected creatures will have to reroll initiative to reenter the battle (if it is still ongoing). This spell can only be cast when there is an active initiative value.
